

Graubner GmbH successfully completes project with BLF Protection GmbH

CE Declaration of Conformity

In times of a corona pandemic, the use of face masks is an essential part of infection control. It is therefore all the more important that the masks meet the highest quality standards.

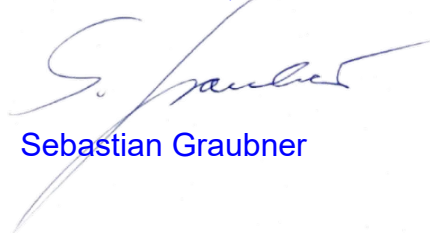

Industrially produced masks require CE marking for sale. This indicates that the products comply with all relevant standards and directives.

BLF Protection GmbH has specialised in mouth-nose masks. The experts of Graubner Industrie-Beratung GmbH supported BLF Protection GmbH in the production according to the standards and the examination of the documents for the CE-marking of the masks.

The masks comply with all relevant provisions of the Product Safety Directive 2001/95/EC.

Graubner Industrie-Beratung GmbH would like to thank BLF Protection GmbH for the successful cooperation and hopes for further exciting projects.

Bad Herrenalb, 01.07.2020
